

EXPLOITATION

- Integration of communication applications
- Integration of controlling and monitoring applications
- Launching of external applications and scripts
- Alarming
- Logging a trending
- Archiving of data to process databases
- Creating of applications based on SOA
- Parallel processing of data (analogic to PLC)

HIGH PRODUCTIVITY

- Configuration instead of programming
- Effective tuning tools
- Software wizards for creating of frequent tasks
- User friendly Grafical Editor of configuration

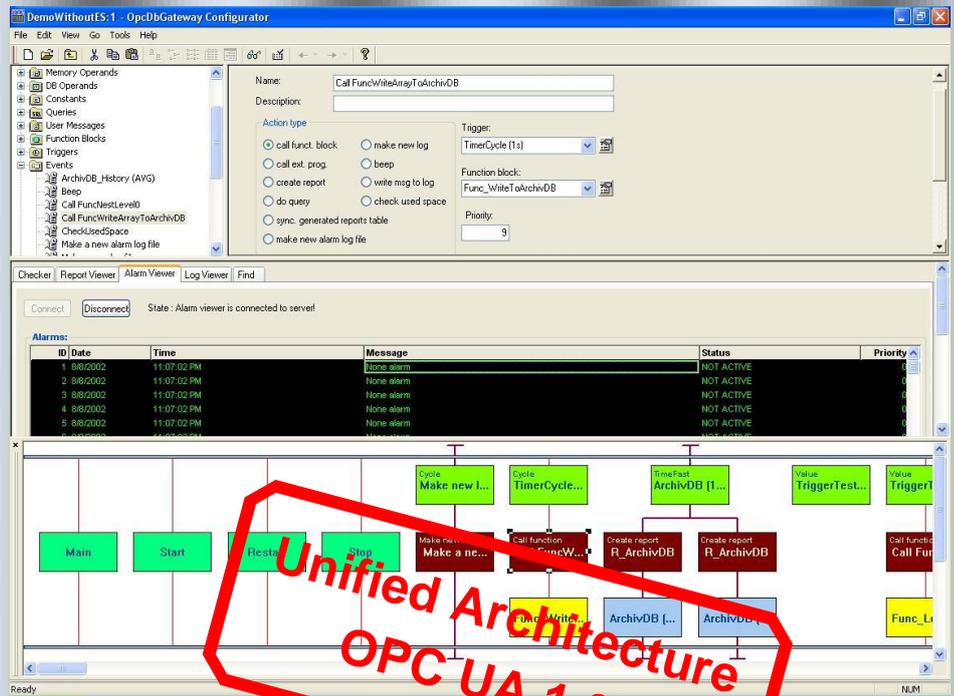

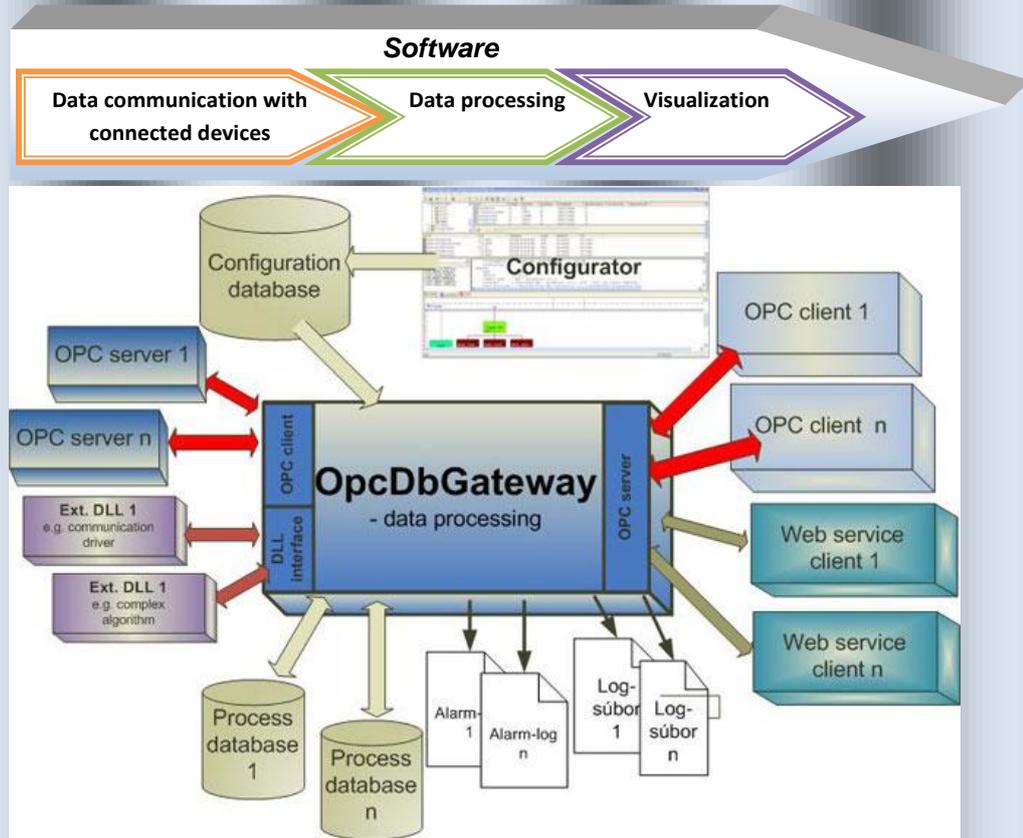

FLEXIBILITY

- Programming of own external libraries (DLL)
- At choice: configurating, SQL, DLL, scripts, etc.

SUPPORT

- Professional support and help during developing of your applications

OpcDbGateway

Unified Architecture
OPC UA 1.01
